THE JOURNAL OF GENERAL PHYSIOLOGY

Founded by Jacques Loeb

EDITORS

W. J. CROZIER
WALLACE O. FENN
JOHN H. NORTHROP
W. J. V. OSTERHOUT

VOLUME THIRTY-FIRST
WITH 10 PLATES AND 182 FIGURES IN THE TEXT

NEW YORK

CONTENTS

No. 1, September 20, 1947

PAGE

Mirsky, A. E., and Ris, Hans. Isolated chromosomes. Plates 1 and 2.... 1
Mirsky, A. E., and Ris, Hans. The chemical composition of isolated chromosomes. Plate 3..... 7
Herriott, Roger M. Identification of mono-iodotyrosine from iodinated pepsin..... 19
Spiegelman, S., Reiner, John M., and Cohnberg, Rosellen. The relation of enzymatic adaptation to the metabolism of endogenous and exogenous substrates..... 27
Reiner, John M., and Spiegelman, S. The preadaptive oxidation of galactose by yeast..... 51
Livingston, L. G., and Medes, Grace. The biosynthesis of C^{13} compounds. I. The biosynthesis of C^{13}-labeled starch..... 75
Oster, Gerald. Studies on the sonic treatment of tobacco mosaic virus. Plate 4..... 89

No. 2, November 20, 1947

Gilder, H., and Granick, S. Studies on the *Hemophilus* group of organisms. Quantitative aspects of growth on various porphin compounds..... 103
Price, Winston H. Bacteriophage formation without bacterial growth. I. Formation of staphylococcus phage in the presence of bacteria inhibited by penicillin..... 119
Price, Winston H. Bacteriophage formation without bacterial growth. II. The effect of niacin and yeast extract on phage formation and bacterial growth in the presence of penicillin..... 127
Price, Winston H. Bacteriophage formation without bacterial growth. III. The effect of iodoacetate, fluoride, gramicidin, and azide on the formation of bacteriophage..... 135
Hecht, Selig, and Hsia, Yun. Colorblind vision. I. Luminosity losses in the spectrum for dichromats..... 141
Spiegelman, S., and Dunn, Reba. Interactions between enzyme-forming systems during adaptation..... 153
Spiegelman, S., and Reiner, John M. The formation and stabilization of an adaptive enzyme in the absence of its substrate..... 175
Bernheim, Frederick, Wilbur, Karl M., and Fitzgerald, Dorothea B. Studies on a new metabolite and its oxidation in the presence of ascorbic acid..... 195

No. 3, January 20, 1948

PAGE

Schmidt, Gerhard, Hecht, Liselotte, and Thannhauser, S. J. The behavior of the nucleic acids during the early development of the sea urchin egg (*Arbacia*) 203

Northrop, John H. Method for obtaining known low concentrations of mustard (H) or lewisite (L) gas in air 209

Northrop, John H. A convenient method for potentiometric titration of chloride ions 213

Robbie, W. A. Some correlations between development and respiration in the sand dollar egg, as shown by cyanide inhibition studies 217

Price, Winston H. Phage formation in *Staphylococcus muscae* cultures. I. A factor necessary for phage formation 233

Stern, Herbert, and Kirk, Paul L. A versatile microrespirometer for routine use 239

Stern, Herbert, and Kirk, Paul L. The oxygen consumption of the microspores of *Trillium* in relation to the mitotic cycle 243

Giese, Arthur C., and Heath, H. Duane. Sensitization to heat by x-rays 249

Wang, Jun-Ch'uan. Penetration of radioactive sodium and chloride into cerebrospinal fluid and aqueous humor 259

Baumgardt, Ernest L. M. The quantic and statistical bases of visual excitation 269

Osterhout, W. J. V. Abnormal protoplasmic patterns and death in slightly hypertonic solutions. Plates 5 to 7 291

No. 4, March 20, 1948

Milstone, J. H. Three-stage analysis of blood coagulation 301

Ponder, Eric. Volume changes in hemolytic systems containing resorcinol, taurocholate, and saponin 325

Villee, Claude A. Studies in biochemical genetics in *Drosophila* 337

DuBois, Kenneth P., Geiling, E. M. K., McBride, Arthur F., and Thomson, John F. Studies on the intermediary carbohydrate metabolism of aquatic animals. I. The distribution of acid-soluble phosphorus and certain enzymes in dolphin tissues 347

Mommaerts, W. F. H. M. The reaction between actomyosin and adenosine triphosphate 361

No. 5, May 20, 1948

Wald, George. Galloxanthin, a carotenoid from the chicken retina 377

Chang, M. C. The effects of low temperature on fertilized rabbit ova *in vitro*, and the normal development of ova kept at low temperature for several days. Plates 8 to 10 385

PAGE

BRAVERMAN, IRVIN, and MORGULIS, SERGIUS. The inhibition of the adenosine triphosphatase activity of actomyosin by magnesium ions 411

ADAMS, MARK H. Surface inactivation of bacterial viruses and of proteins 417

HENDLEY, CHARLES D. The relation between visual acuity and brightness discrimination 433

No. 6, JULY 20, 1948

HECHT, SELIG, SHLAER, SIMON, SMITH, EMIL L., HAIG, CHARLES, and PESKIN, JAMES C. The visual functions of the complete colorblind 459

FONG, JACOB. The protective effect of sodium chloride against thermal destruction of the phage-forming mechanism in staphylococci 473

KRUEGER, A. P., COHN, T., SMITH, P. N., and MCGUIRE, C. D. Observations on the effect of penicillin on the reaction between phage and staphylococci 477

WALD, GEORGE. The synthesis from vitamin A_1 of "retinene$_1$" and of a new 545 mμ chromogen yielding light-sensitive products 489

LEFEVRE, PAUL G. Evidence of active transfer of certain non-electrolytes across the human red cell membrane 505

LATARJET, RAYMOND. Intracellular growth of bacteriophage studied by Roentgen irradiation 529

INDEX TO VOLUME 32 547
